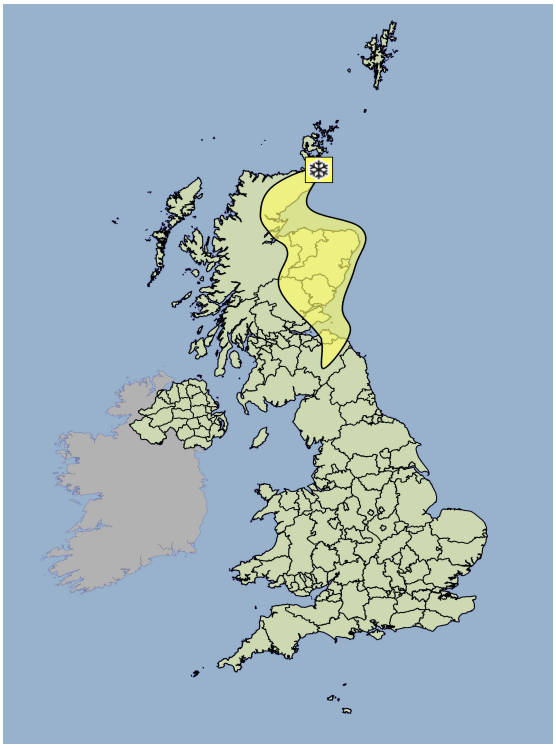
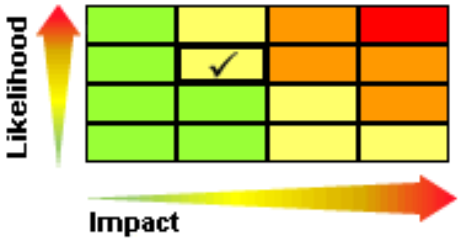
National Severe Weather Warning Service





Chief Forecasters Assessment
East or northeasterly winds will being increasingly cold air into Scotland during Monday. This will allow early rain or sleet over eastern and northeastern Scotland to turn to snow, initially over higher level roads and later to increasingly lower levels. Accumulations in excess of 10cm are expected above 300 metres. At lower levels, particularly in urban areas on or near the east coast, accumulations will be much smaller, especially by day.

The Met Office have issued a **Yellow Alert** of **Snow**

Valid from **00:05 on Mon, 18th Mar 2013** until **23:59 on Mon, 18th Mar 2013**

Outbreaks of rain or sleet are expected to start to turn to snow on higher level roads above 300 metres in eastern and northeastern Scotland early on Monday. Later on Monday this rain or sleet will turn increasingly to snow at lower levels. The public should be aware of the risk of disruption to transport through this period.
